

NEW PRODUCT INTRODUCTION

Date: October 2009
From: Michael Franz - Sr. Product Manager
Re: Standard Collection - **Titmus SC910**

The Standard Collection represents our most basic safety designs that are focused on value at a low cost. These designs are all about function, value and basic attributes with safety as the overriding concern. And now we are introducing our latest design, the **Titmus SC910**, with some excellent features and benefits:

- Injection molded fronts and temples ensure consistent dimensioning for consistent performance.
- A modified rectangular shape is perfect for today's market and will accommodate a full range of Rx's including popular progressive lens designs.
- Propionate fronts are mated to polycarbonate temples for a lightweight fit and robust functionality.
- Temples do not have metal core wires, which reduces weight for increased comfort, and reduces exposure in electrical environments; making the **Titmus SC910** suitable for some specialty markets.
- A three millimeter spread, from the small eyesize to the larger one, contributes to a wider range of fit for end users, guaranteeing increased placements.
- A keyhole nasal design permits a wider range of fit for end users, increasing this design's application range.

Like all Uvex Rx products, the **Titmus SC910** meets the ANSI Z87.1 - 2003 Standard.

Description	Sizes	Colors	Suggested Resale Price
Titmus SC910 *	52.16.140	Brown	\$17.99
Titmus SC910 *	55.18.145	Gray	\$17.99
Replacement Temples	140 and 145	Gray or Brown	\$9.99
Replacement Shields	Not Available (Integral Shield Design)	Not Applicable	Not Applicable

* Sold assembled only.
